Appendix: Departmental Cost Summary

I. Scope

This Equipment Note gives guidance on the basic equipment requirements for an Occupational Therapy Department. It is intended to be read in conjunction with Hospital Building Note No. 9 which relates to the design and planning of an occupational therapy department at district general hospitals or teaching hospitals. It covers district general hospitals with psychiatric units, but does not apply to wholly psychiatric hospitals which will be dealt with in separate Notes.

II. General Considerations on the Use of Equipment Notes

Equipment Note No. 1 (Equipping a hospital building) provides an introduction to the series of departmental Equipment Notes, advice on their application and guidance on the task of preparing equipment schedules for individual building projects. This departmental Equipment Note is intended to be used within the general planning framework set out in Equipment Note No. 1 and in the manner described therein.

The following method of classifying equipment, which is explained in more detail in Hospital Equipment Note No. 1, is used throughout this Note:

The term "equipment" covers all items necessary for the functioning of the hospital and includes both non-technical (e.g. furniture) and technical equipment. Short-term consumable supplies such as fuel, stationery, food, drugs and dressings are not included.

Equipment is classified into three groups:

Group I: items usually supplied and fixed by the contractor for the works.

Group II: items having a permanent or semi-permanent location and having a significant effect on space and/or structural requirements:

(*a*) those supplied by the hospital authority and fixed by the contractor for the works;

(*b*) those supplied by the hospital authority and put in position by them or on their instructions outside the general construction contract.

Group III: smaller items, usually storage items, supplied and put in position by the hospital authority.

III. Special Considerations in Respect of this Note

An occupational therapy department and a physiotherapy department together constitute the treatment side of a Department of Physical Medicine and the two should be planned together to form one unit. The equipment requirements for a physiotherapy department are dealt with in Hospital Equipment Note No. 8.

The equipment detailed in this Note is regarded as suitable to the department described in Building Note No. 9 and has been listed in room (or space) sequence conforming to the Building Note. The lists are drawn up in such a way that they are applicable to departments of varying sizes and of varying designs within the context of the Building Note.

The ratio of places required in the three main sections of the department, viz. heavy workshop, light workshop and domestic section, will vary widely, depending on the type of patients predominating (e.g. orthopaedic, geriatric or neurological, etc.), the situation of the hospital (e.g. whether in an industrial or rural area) and other factors. For the purpose of this Note it has been assumed that an average department would consist of 5 domestic places to 15 light workshop places to 25 heavy workshop places and the equipment for the three main sections has been provided on this basis. Provision has also been made however for workshops smaller than and larger than the average size for use in projects where one or other sections varies from average size, thus:

	Number of places in the workshop or section		
Heavy workshop	10	25	40
Light workshop	6	15	24
Domestic section	2	5	8

From the equipment schedule it is therefore possible, for example, to associate the equipment most suitable for a smaller-than-average heavy workshop with a correspondingly larger-than-average light workshop in a department serving a rural population.

The equipment listed represents average provision in the light of present practice. It is realised however that this is a field in which methods vary and are constantly changing and some alternative provision may be preferred; this should be possible within the recommended cost guide figures.

Throughout the department special attention will need to be given to the needs of the disabled in respect of heights of lavatory seats and chairs, special tap fittings for cookers and hot and cold water systems, etc.

Some fixed items of equipment (Group I) have already been mentioned (and costed) in the Building Note, but it has been thought useful to include them again in the Equipment Note, which represents the

results of a comprehensive review of the requirements. Reference should, however, be made to the Building Note—Part V, Engineering Services—for further information on the mechanical services and electrical installation. Structural elements, floor coverings, non-specialised heating and lighting fittings and similar items which are basic to any building are not included in the Equipment Note; neither are window blinds and window curtain tracks since the requirements may vary with local circumstances.

Throughout the schedule, for the sake of uniformity, references to towel dispensers are associated with disposal bins for paper towels. Suitable adjustments will need to be made where linen towels are to be used.

IV. Cost

Guidance on the cost of equipping an occupational therapy department to the standard shown in this schedule is given against the list of equipment for each room. Departmental cost summaries are shown in the Appendix to the Note. In using these cost figures, the considerations referred to in Section IV of Equipment Note No. 1 should be borne in mind.

The cost figures in this schedule and in the Appendix are related only to Group II and Group III equipment. As a matter of convenience, Group I items of a specialised nature are listed in each room schedule, but these have already been taken into account in the cost allowance for construction (including engineering), in the appropriate Cost Note in Appendix E to Hospital Building Note No. 2.

VI. Schedule of Equipment

A. Basic Accommodation

(*a*) ENTRANCE

(i) *Waiting room or bay*

When the occupational therapy department forms part of a Department of Physical Medicine this room should, where possible, be combined with the physiotherapy department waiting room.

		Quantity	*Notes*
Basic List			
Group I:	Board, notice	1	
Group IIb:	Chair	8	A variety of chairs of varying heights may be particularly desirable here.
	Table, occasional, low	2	
	Rack, magazine	1	
Group III:	Bin, waste paper	1	If smoking is to be allowed, ashtrays will need to be provided; otherwise " No Smoking " notices. However, ashtrays should be provided at the entrance for people who are smoking when they enter the department.
	Cost Guide (excluding Group I)	£55	

(ii) *Patients' cloakroom and lavatories*

When the occupational therapy department forms part of a Department of Physical Medicine these rooms should, where possible, be combined with similar rooms in the physiotherapy department. Equipment is shown on a unit basis.

Occupational Therapy Department

DEPARTMENTAL COST SUMMARY

(To be read in conjunction with the explanatory notes in Section IV of this Equipment Note and Section IV of Hospital Equipment Note No. 1)

The room cost guide figures for basic equipment (Groups II and III), applied to standard schedules of basic accommodation for departments of various sizes, suggest departmental equipment cost totals of the following order:

Total number of work places				
18	30	45	60	72
£1,800	£2,200	£2,800	£3,600	£4,250

In these totals no account is taken of the following:

(*a*) Equipment required for basic accommodation, additional to the basic list, some guidance on which is given under the appropriate rooms;

(*b*) Equipment required in "additional accommodation", cost guides for which are shown on the appropriate pages as for basic accommodation.
